

Robert Castellanos-Whitfield

candidate@example.com | (555) 010-2000 | Portland, OR

PROFESSIONAL SUMMARY

Manufacturing and quality professional with a twenty-five-year record spanning machining, inspection, supervision, and continuous-improvement leadership across five plants.

CORE SKILLS

CNC Machining | GD&T | Lean Manufacturing | Root Cause Analysis | SPC | Kaizen Facilitation | ISO 9001 | Supplier Audits

EXPERIENCE

Continuous Improvement Manager | Precision Aerostructures | 2024–2026

- Led 3 process-improvement events with documented annual savings
- Maintained first-pass yield above 99% across assigned work centers
- Trained 2 operators on inspection and setup procedures
- Reduced setup time 10% through standardized tooling carts
- Documented 20 work instructions to current revision

Quality Engineering Supervisor | Precision Aerostructures | 2022–2024

- Led 4 process-improvement events with documented annual savings
- Maintained first-pass yield above 98% across assigned work centers
- Trained 3 operators on inspection and setup procedures
- Reduced setup time 11% through standardized tooling carts
- Documented 25 work instructions to current revision

Senior Quality Inspector | Vector Machining | 2020–2022

- Led 5 process-improvement events with documented annual savings
- Maintained first-pass yield above 97% across assigned work centers
- Trained 4 operators on inspection and setup procedures
- Reduced setup time 12% through standardized tooling carts
- Documented 30 work instructions to current revision

Quality Inspector II | Vector Machining | 2018–2020

- Led 6 process-improvement events with documented annual savings
- Maintained first-pass yield above 96% across assigned work centers
- Trained 5 operators on inspection and setup procedures
- Reduced setup time 13% through standardized tooling carts
- Documented 35 work instructions to current revision

CNC Cell Lead | Vector Machining | 2016–2018

- Led 7 process-improvement events with documented annual savings
- Maintained first-pass yield above 95% across assigned work centers
- Trained 6 operators on inspection and setup procedures
- Reduced setup time 14% through standardized tooling carts
- Documented 40 work instructions to current revision

CNC Machinist III | Cascade Tool & Die | 2014–2016

- Led 8 process-improvement events with documented annual savings
- Maintained first-pass yield above 94% across assigned work centers

- Trained 7 operators on inspection and setup procedures
- Reduced setup time 15% through standardized tooling carts
- Documented 45 work instructions to current revision

CNC Machinist II | Cascade Tool & Die | 2012–2014

- Led 9 process-improvement events with documented annual savings
- Maintained first-pass yield above 93% across assigned work centers
- Trained 8 operators on inspection and setup procedures
- Reduced setup time 16% through standardized tooling carts
- Documented 50 work instructions to current revision

CNC Machinist I | Cascade Tool & Die | 2010–2012

- Led 10 process-improvement events with documented annual savings
- Maintained first-pass yield above 92% across assigned work centers
- Trained 9 operators on inspection and setup procedures
- Reduced setup time 17% through standardized tooling carts
- Documented 55 work instructions to current revision

Machine Operator | Northwest Fabrication | 2008–2010

- Led 11 process-improvement events with documented annual savings
- Maintained first-pass yield above 91% across assigned work centers
- Trained 10 operators on inspection and setup procedures
- Reduced setup time 18% through standardized tooling carts
- Documented 60 work instructions to current revision

Production Associate | Northwest Fabrication | 2006–2008

- Led 12 process-improvement events with documented annual savings
- Maintained first-pass yield above 90% across assigned work centers
- Trained 11 operators on inspection and setup procedures
- Reduced setup time 19% through standardized tooling carts
- Documented 65 work instructions to current revision

Tool Crib Attendant | Ironside Manufacturing | 2004–2006

- Led 13 process-improvement events with documented annual savings
- Maintained first-pass yield above 89% across assigned work centers
- Trained 12 operators on inspection and setup procedures
- Reduced setup time 20% through standardized tooling carts
- Documented 70 work instructions to current revision

Material Handler | Ironside Manufacturing | 2002–2004

- Led 14 process-improvement events with documented annual savings
- Maintained first-pass yield above 88% across assigned work centers
- Trained 13 operators on inspection and setup procedures
- Reduced setup time 21% through standardized tooling carts
- Documented 75 work instructions to current revision

General Laborer | Ironside Manufacturing | 2000–2002

- Led 15 process-improvement events with documented annual savings
- Maintained first-pass yield above 87% across assigned work centers
- Trained 14 operators on inspection and setup procedures
- Reduced setup time 22% through standardized tooling carts
- Documented 80 work instructions to current revision

EDUCATION

A.A.S. Machine Tool Technology — Community College | 1999; Lean Six Sigma Black Belt — ASQ | 2015
